

Policy on Internships for Academic Credit
College of Engineering & Mathematical Sciences
University of Vermont

h %o š
^ %o 2021P

Rationale for a policy

Internships provide CEMS students the opportunity to gain practical, hands-on experience in their disciplines. Students are able to apply what they learn in the classroom within a real-world setting and in turn, bring knowledge and skills gained in the field back to the classroom. When combined with related academic coursework, internship experiences are valuable educational experiences. X

Policy provisions
